

A tool to facilitate note-taking and reading

Description

One note can contain an extension with a set of tools that facilitate learning for children with special special learning needs such as a dictation tool, an adaptive adaptive page layout and an an immersive reader etc...

OneNote

Price:

Free of charge.
Included in the office pack.

This resource can be helpful for:

- Learning disabilities (reading difficulties)
- Visual impairment
- Hearing impairment.
- All students

Accessibility grade:

- Dictate a text, a note.
- Edit, format (choice of font, size, space between words/phrases) a text, even from an image or a pdf.
- Have the imported text (word, pdf, image ...) read to an immersive reader.

Practical use

The One Note software can be used to help special needs students study, as they can dictate notes using the dictation tool.

They can also take ownership of materials and read more easily by formatting texts as well as being helped by an immersive reader.

HOW TO USE ?

STUDENT

Type, write, draw, paste text, add picture, image or scheme.

Step 1.

Go to this link:

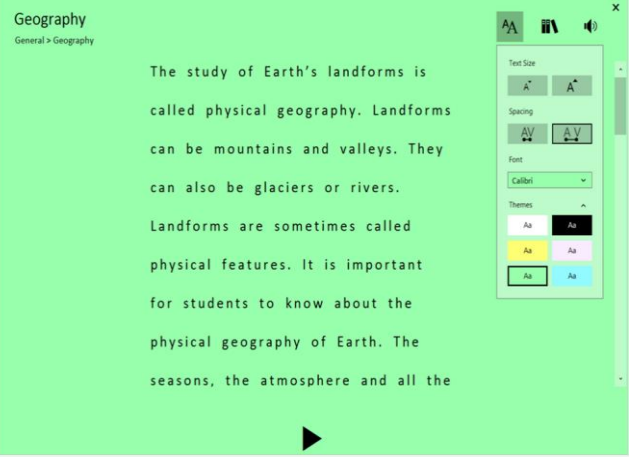

https://www.youtube.com/watch?v=e4GDtU-8_4g.

You will find the download link of the ONE NOTE application extension which is called "educational tools".

[OneNote-Learning-Tools-general-availability - 2](#)

Step 2.

You can import a text from internet, from Word ... Then, thanks to the pictograms at the top right, you can change the size of the text, the space between the words and between the lines, add a background color etc...

Step 3.

It is also possible to have the text read by the immersive reader. During the reading, the word read is highlighted.

You can also dictate a text. Your voice will be instantly transcribed into written text.
