Appypie

APP CREATOR

Description:

Appypie is an app maker that lets you build application in a few minutes with no coding experience required.

There are several creation options, and the finished product can be uploaded to the IOS or Android store.

The apps designed from Appypie have a large range of utilities for class management. From offline exercises, real-time updates, grades and scores, to direct feedback and review.

Accessible for:

- Primary and secondary students in general
 - Learners with poor time management skills,
 - Learners with attention disorders such as ADHD/ADD
 - Learners with SLDs

Price:

7-days free trial, then a basic plan of 16€/month

Accessibility Grade:

Making an app is very easy! Using it takes a little practice.

Practical Ideas:

- Create an app for your classroom to interact with. This can give a sense of belonging if the app is specifically designed for the students.
- Add your own content or material related to your class or lessons.

DIGITALL

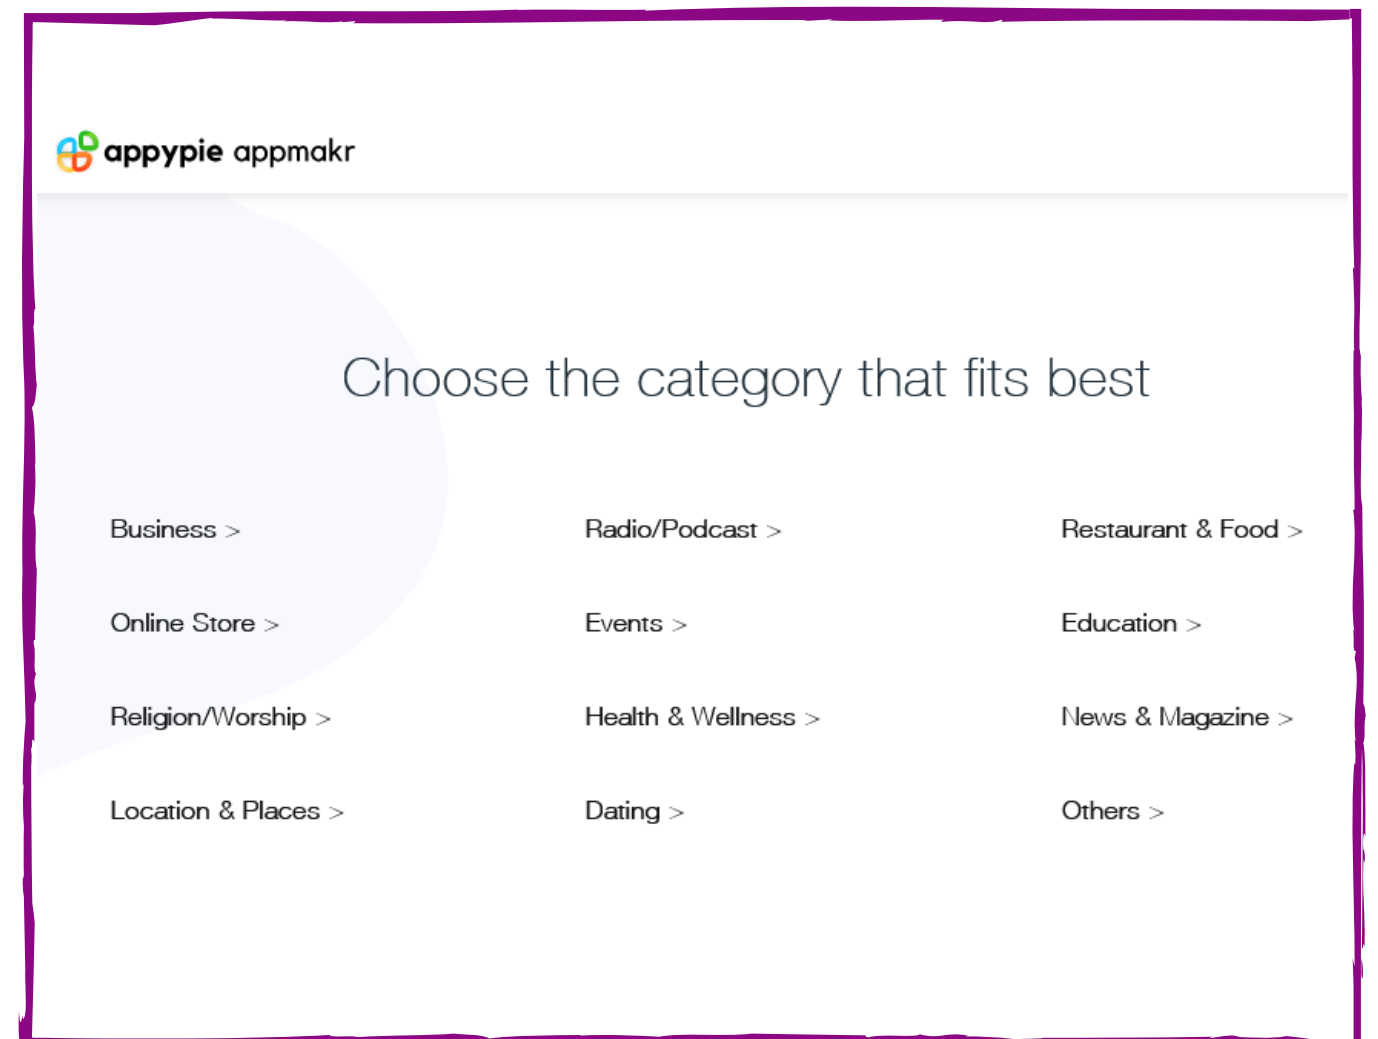

HOW TO USE?

Appypie is made to be intuitive and easy to use. It does not require any coding experience, not specific knowledge about apps.

Step 1.

To start, create an account and add the name of your app, as well as the purpose of your app.

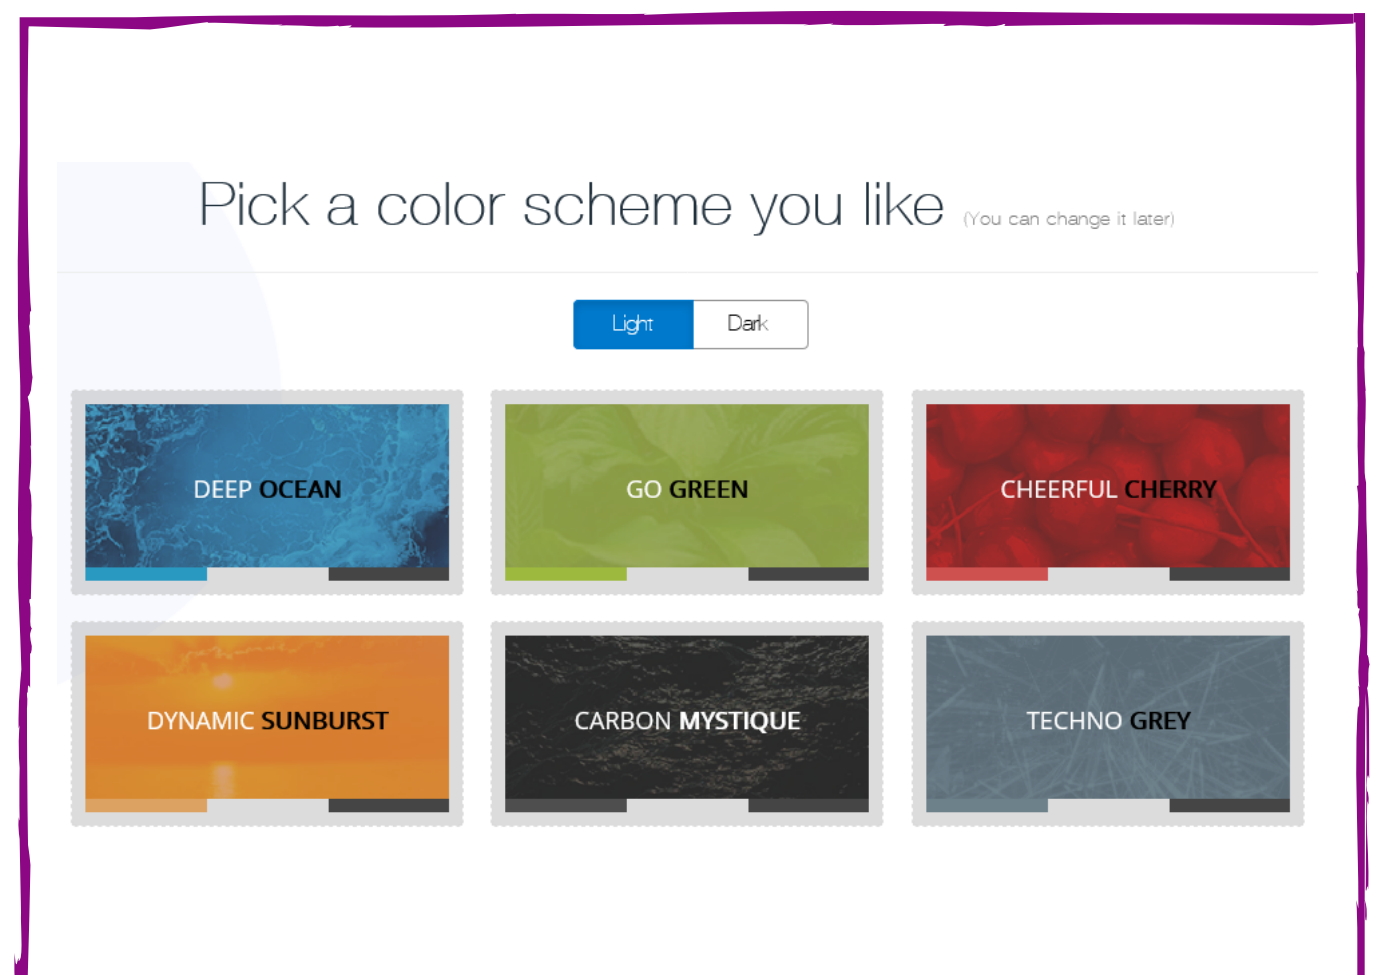

This will help with the selection of the layout.

Step 2.

The next step is the customization step. Select your device support (Android or IOS) then the specific layout of your app.

You have various choices as to the layout, the themes, the fonts, background elements and more.

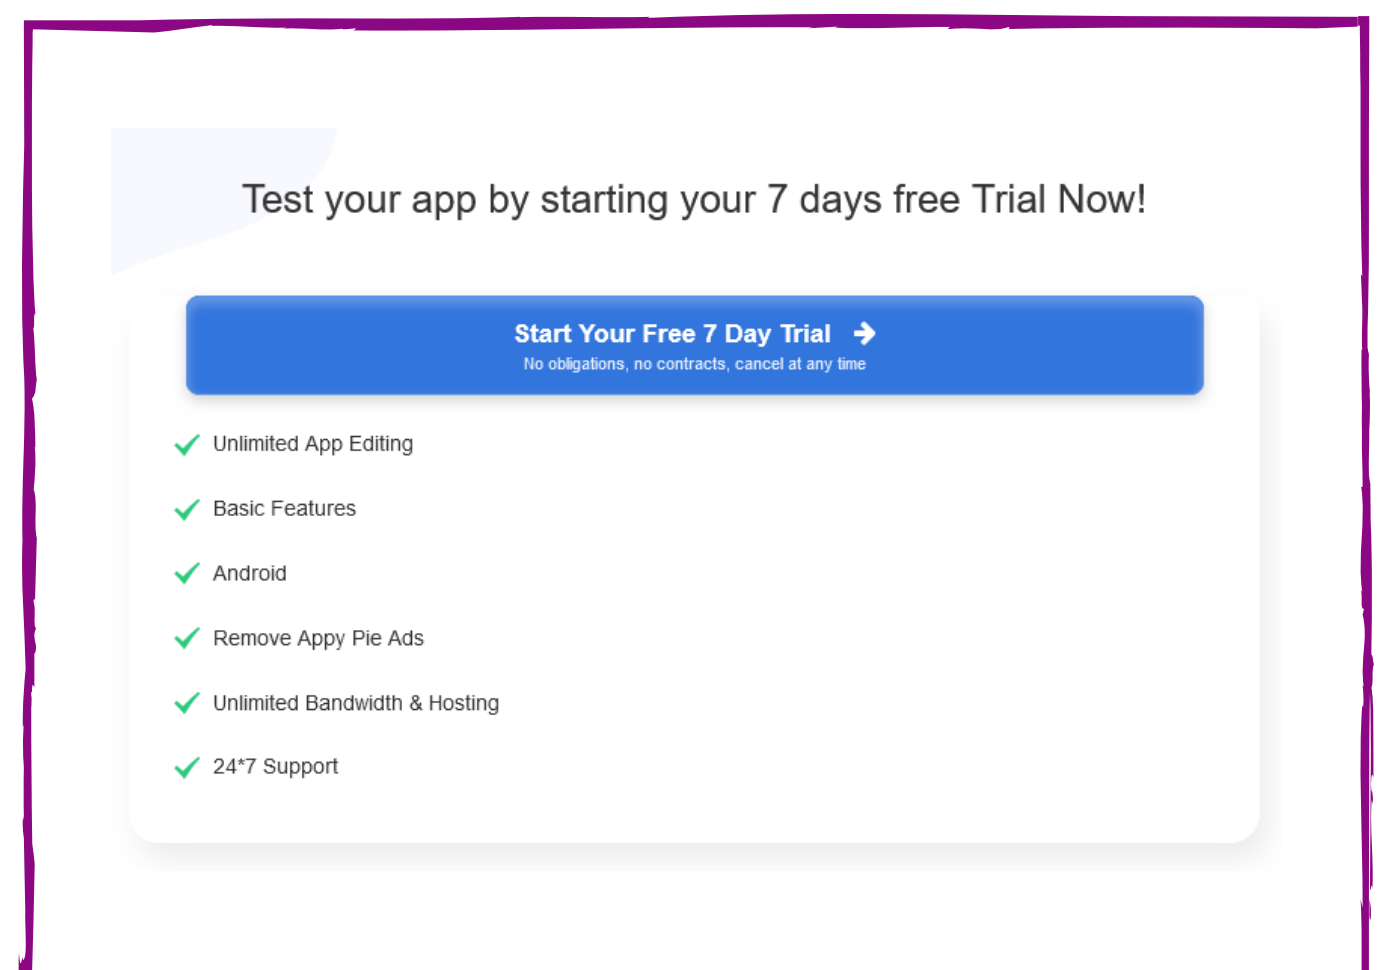

Step 3.

Lastly, enter your log in details by creating an account, and select your plan.

You can try the app during 7 days and then the basic plan is 16€ per month.

Download the app on your phone, and share with your students!
