

## MINDMAP CREATOR

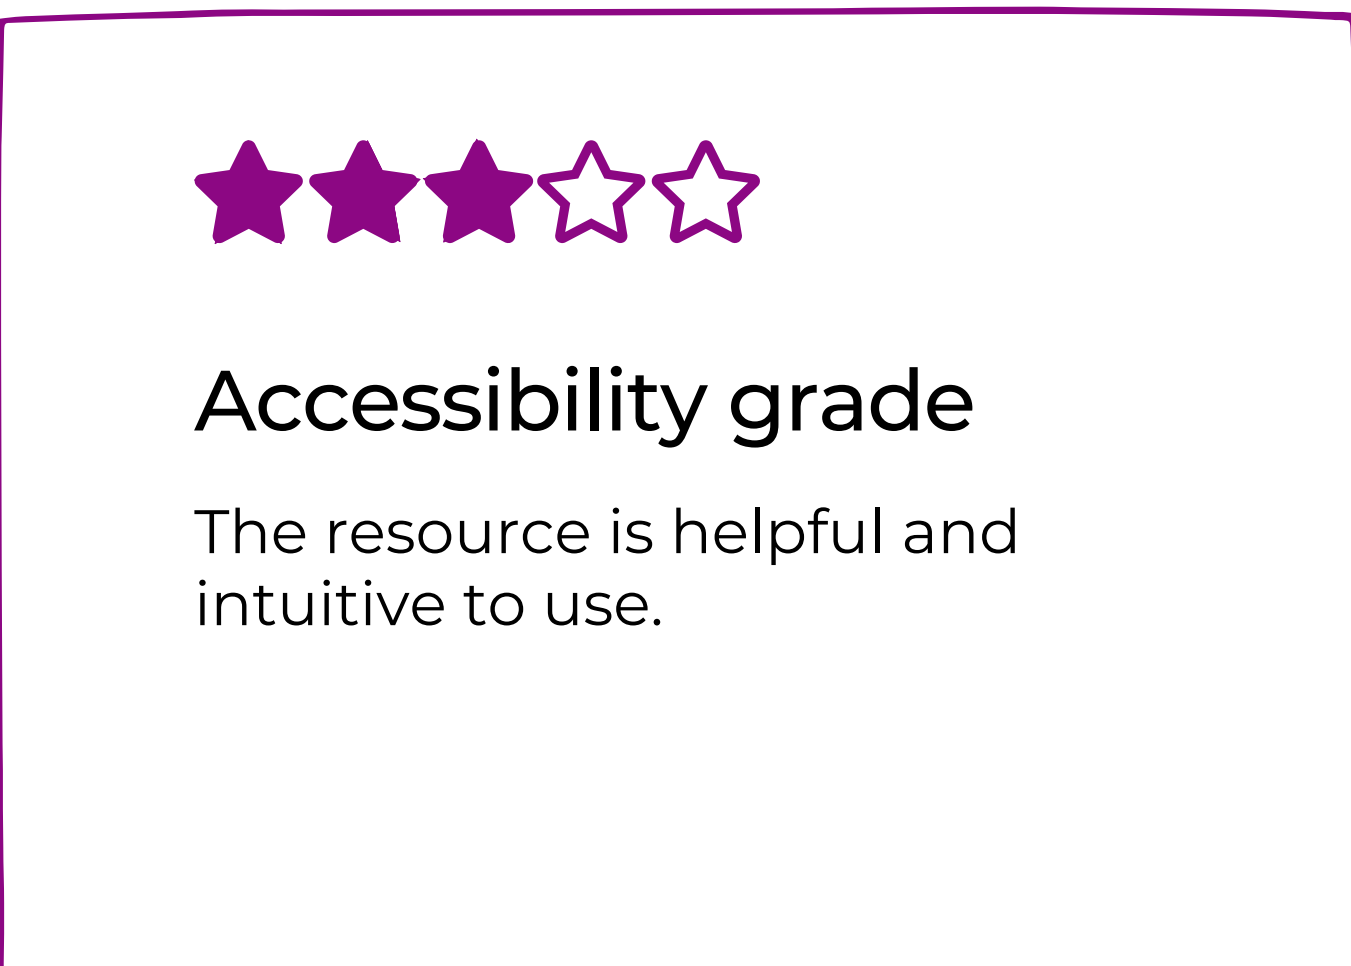

### Description

This tool allows creating visual representation of ideas and concepts. It's particularly useful with students who have difficulty organizing and integrating thoughts and ideas.

Create content of the lessons accessible to students with:

- Reading related difficulties.
- Attention related difficulties.
- Hearing related issues.

### Practical use

Use this resource to create visual summary of information, in the form of conceptual and mind maps. Show these during lesson to keep visual reference of important lesson information.

# HOW TO USE?

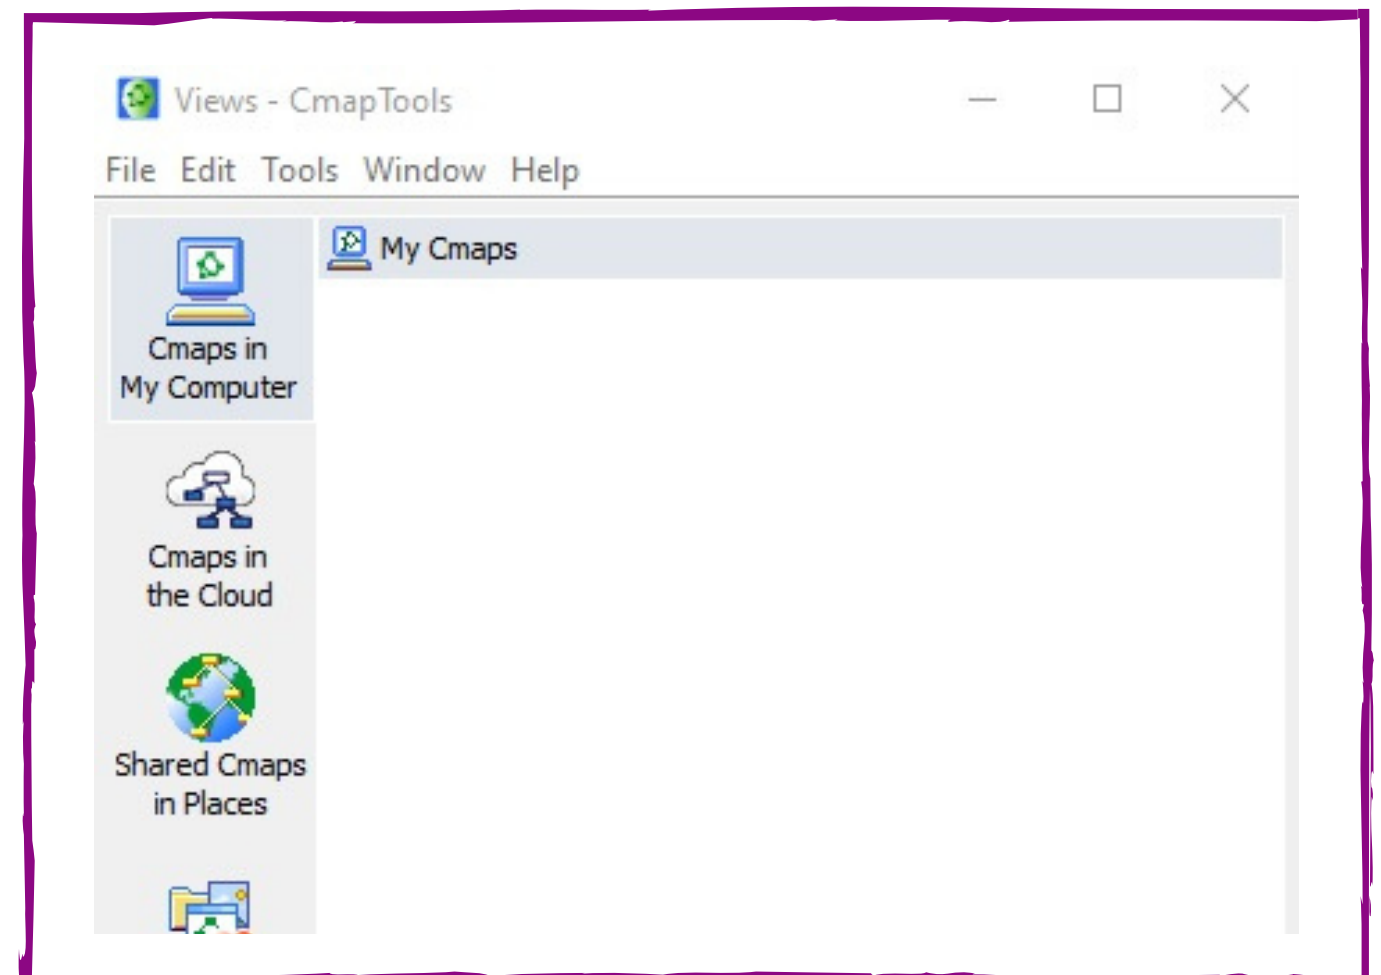

TEACHER

Start from a basic construct and drag related concepts.

## Step 1.

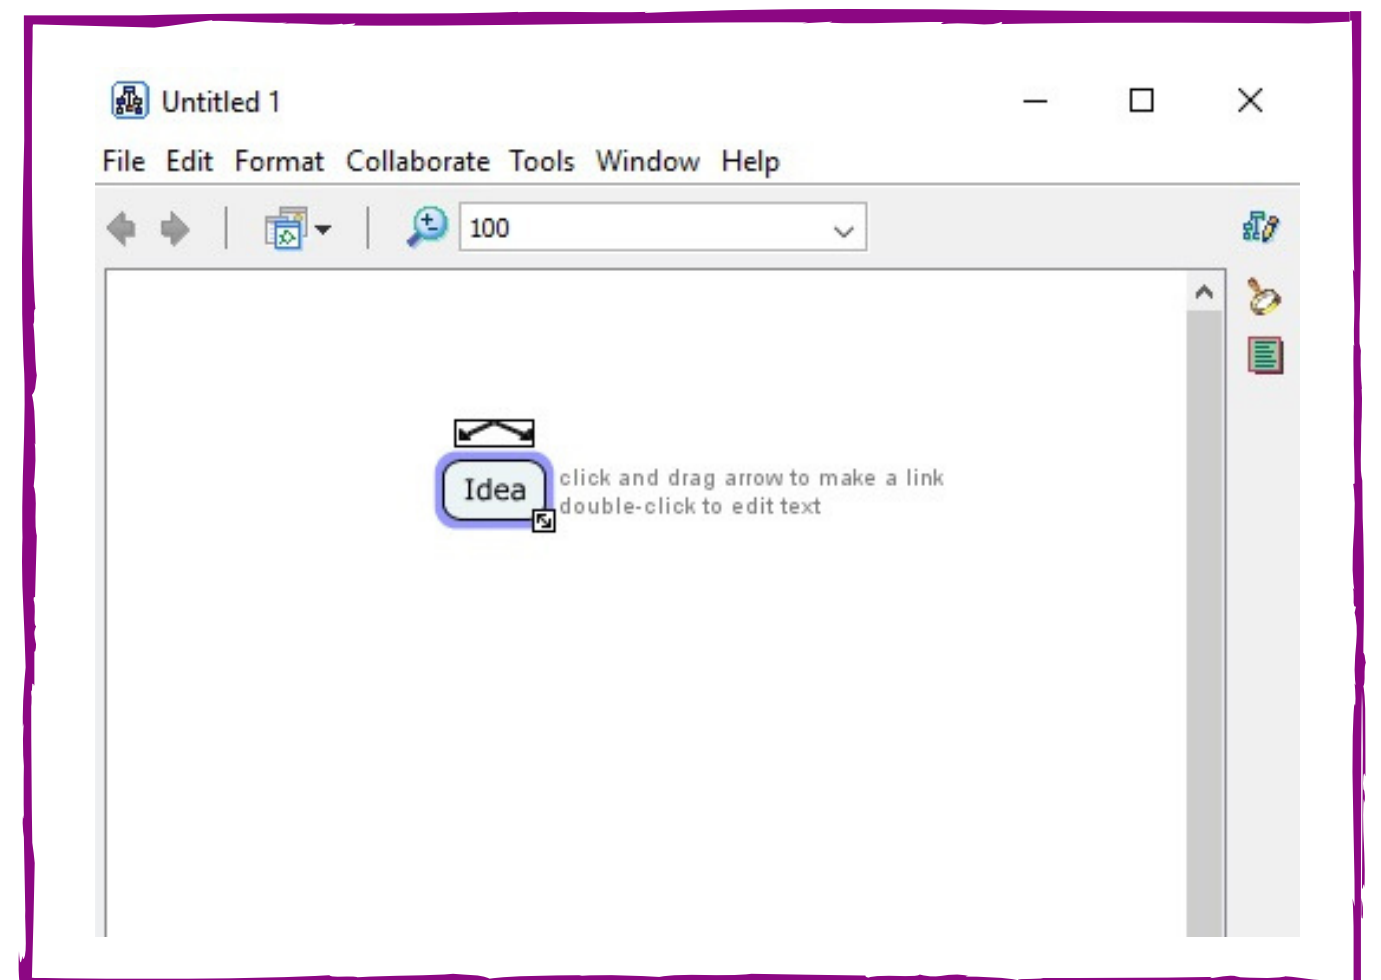

Open a "new study tab" and name it or choose an already existing one from your PC, Cloud or shared folder.

## Step 2.

Write the start concept from the first node.

You can later link this to other smaller nodes connected to the first concept.

## Step 3.

Drag arrows the top of the first node concept to connect new concepts.

You can name the arrows to add information towards some smaller node.
