HOW TO USE?

DIGITALL

There are no complex steps in Grammarly. You can copy and paste text directly into the reader, and it will analyze it on the spot. It is then up to you to decide which modification you want to apply.

Step 1.

There are two options: You can either copy and paste a text you have already written, or write directly into the reader.

Once your text is in Grammarly, it will show you different highlight colors.

Each different items means a different modification that could be applied.

One Hundred Years of Solitude, Gabriel García Márquez, 1998

Many years later, as he faced the firing squad, Colonel Aureliano Buendía was to remember that distant afternoon when his father took him to discover ice. At that time Macondo was a village of twenty adobe houses, built on the bank of a river of clear water that ran along a bed of polished stones, which were white and enormous, like prehistoric eggs. The world was so recent that many things lacked names, and in order to indicate them it was necessary to point. Every year during the month of March a family of ragged gypsies would set up their tents near the village, and with a great uproar of pipes and kettledrums they would display new inventions. First they brought the magnet.

Step 2.

Next to your text, you will see the modifications that could be applied.

Grammarly will highlight in red the punctuation, spelling or convention mistakes.

In blue, the conciseness, readability and complexity of sentences.

● **PUNCTUATION**
