

## SPEECH TO TEXT TRANSCRIPTION

### Description

Temi is speech recognition software. It works when you transfer any type of file, be it audio or video, and it transcribes audio to text. The files can be saved in MS Word or PDF formats.

**Price:** Free trial (includes 1 transcription),  
\$0,25 cents per audio  
minute

### This resource can be helpful for students with:

- attention related issues
- reading and writing related issues
- hearing related issues

### Accessibility grade

This resource can be helpful for studying and transcribing small audio files to text.

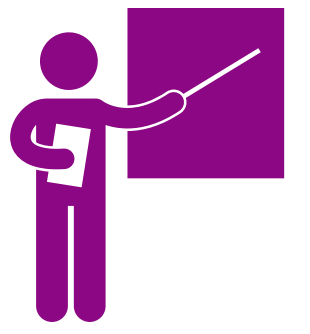

### Practical use

A student could need to access lesson content in a different form than oral, because of hearing impairment or revision reasons. Use the tool to transcribe audio files to text format to analyze it or study.

DIGITALL

# HOW TO USE?

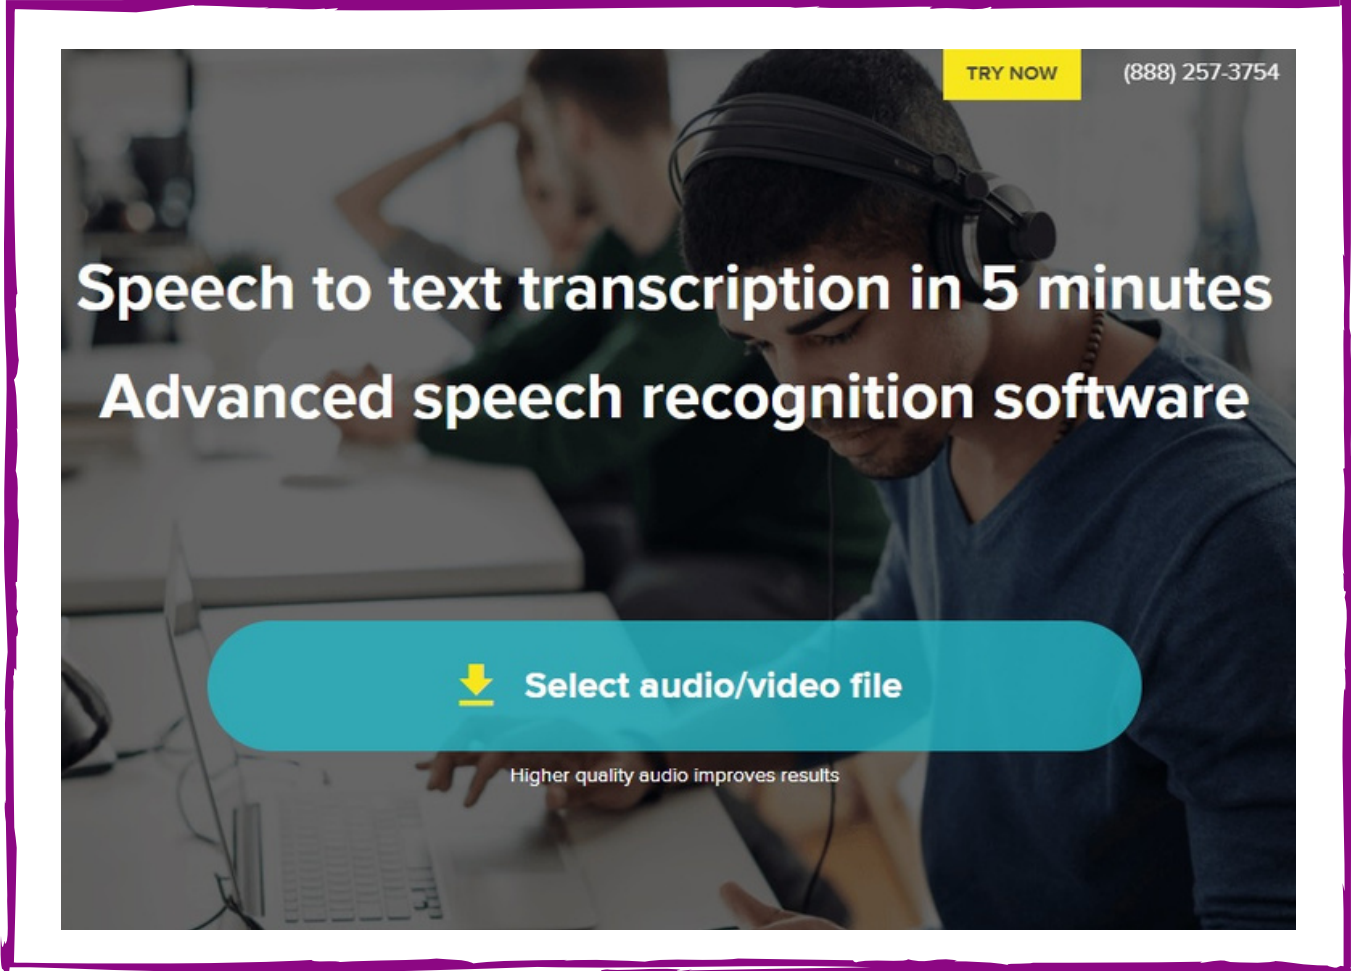

TEACHER

Upload desired file, wait for transcription time and receive the text by email.

## Step 1.

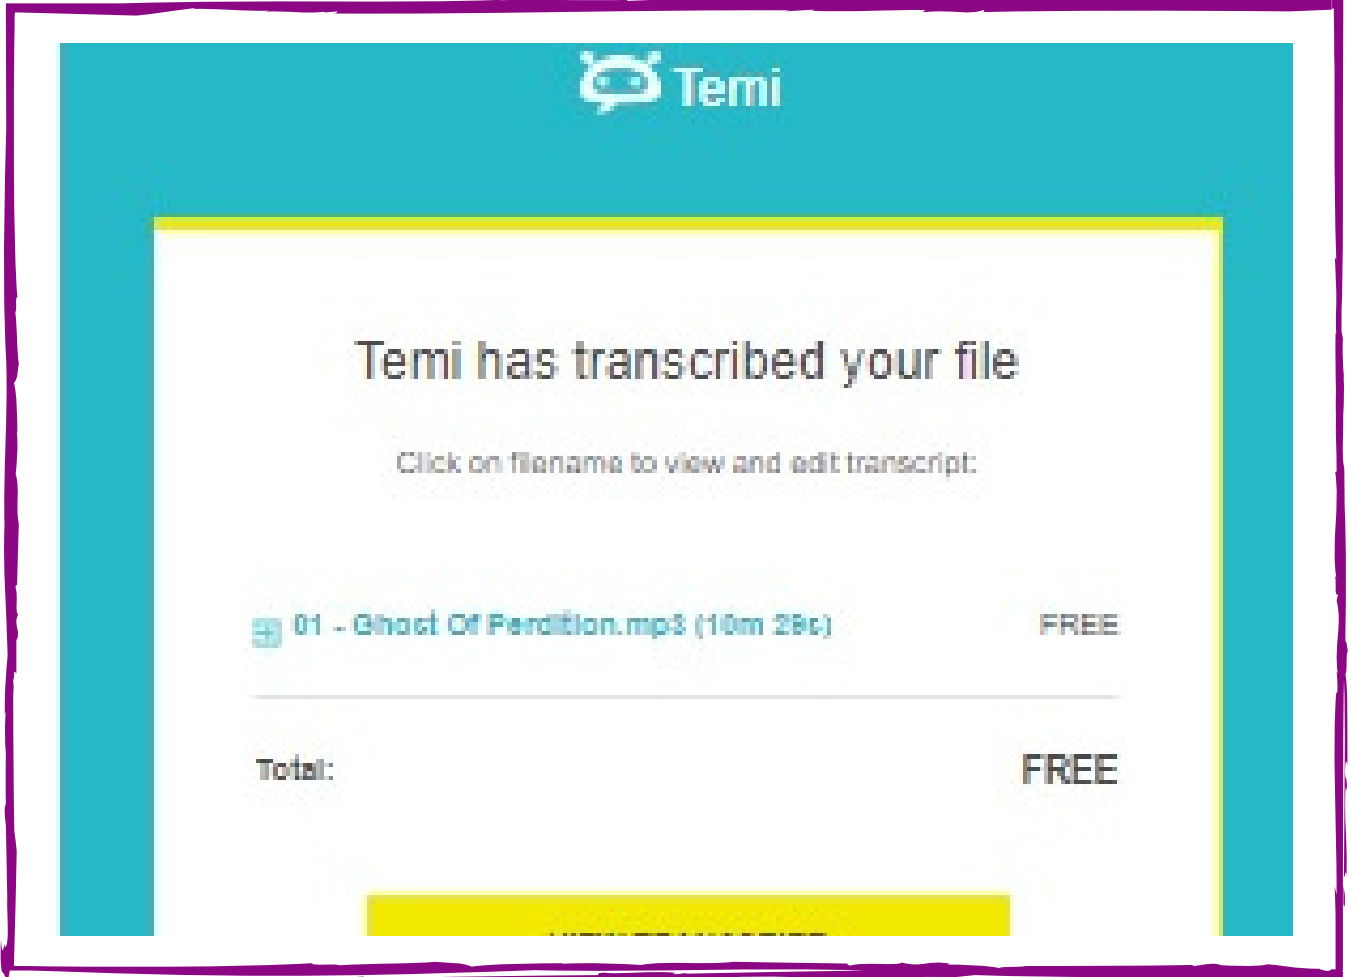

Upload the desired audio file to convert to text. Any audio format is accepted.

Audio quality can affect the success of the transcription.

## Step 2.

Wait for the transcription to be over, you'll receive an email with the transcribed text.

## Step 3.

You can edit or review the transcript, you can modify timestamps and assign speakers.

Save and export to MS Word, PDF, SRT, VTT and more formats.
