

REASONABLE ACCOMMODATION

Refer to PRACTICAL SHEET n°:
WC15

Use these TOOLBOX resources:

Exercises

Instructions for the following exercises

For each of the following exercises you will be given clinical label explaining one student difficulties. You will have to find some accommodations (organizational, material, pedagogical) to implement into your teaching practice to help the described student

Clinical vignette

Thomas is 7 years old. He is in the second year of primary school. His score in French and Maths are below average. He can write quite well but only if he is concentrated and motivated. However his handwriting is really big.

Thomas is easily distracted, he looks everywhere. If given multiples exercises at the same time, he will start each of them without finishing any. He works better if he is sat next to the teacher.

He understands instructions quickly and easily.

In his free time, he likes to play outside and watching movies and cartoons about dinosaurs. Him and his classmates have good relationships.
