

I LOVE PDF

Refer to PRACTICAL SHEET n°:
WC15

Use these TOOLBOX resources:
ILovePDF

Adapt the format of files

IlovePDF

Teachers must train to convert file types to the desired format according to their needs.

- situation 1: you created a word document that you have to send to your students, but you want them not to modify the document.
- situation 2: you found a book in pdf format, but it is a very long document. Actually, you are looking just for some specific pages within the document.
- situation 3: you took some pictures for a lesson, but you have to send them out to your students. In order to send a clear document, you need to merge the pics in only one document.

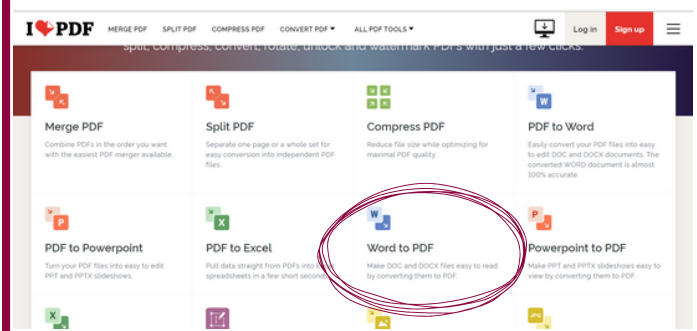

Remember to:

- create an account for a better user experience
- you can choose your files also from gdrive or dropbox
- once you changed a document, you can continue with processing it or save it on your Computer, Gdrive or dropbox

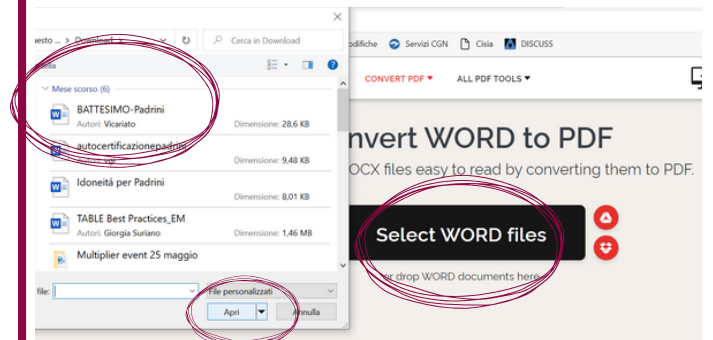

Situation 1:

Let's try step by step:

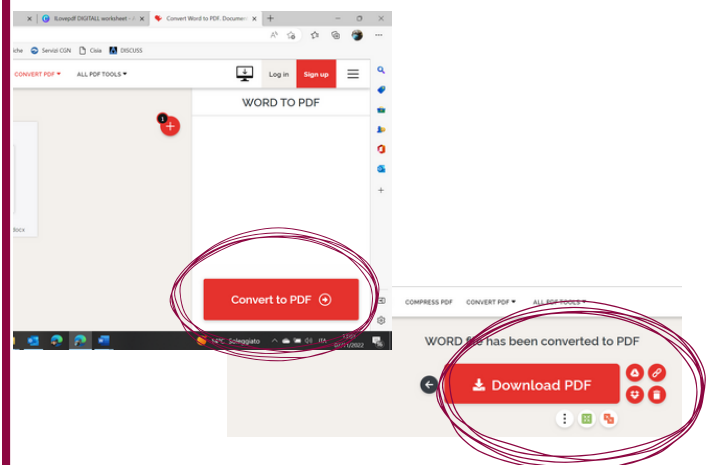

Step 1: Choose your tool

Step 2: Upload your file

Step 3: Convert and download

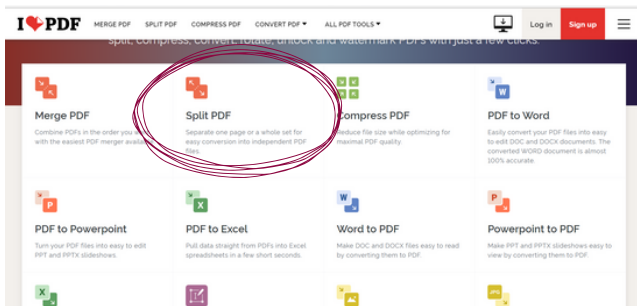

Adapt the format of files

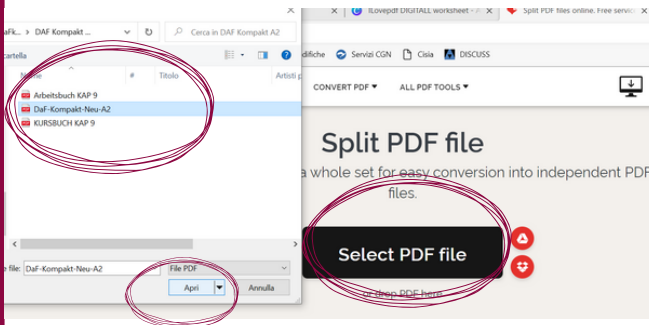

Situation 2:

Let's try step by step:

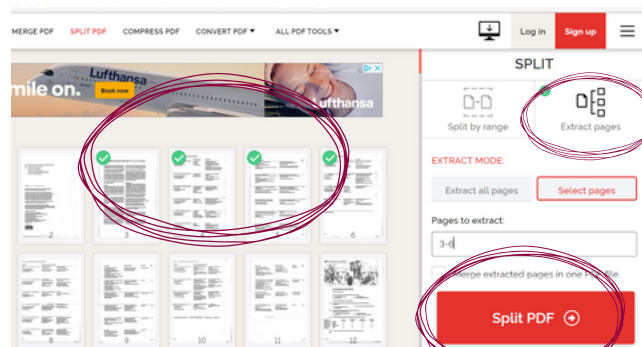

Step 1: Choose your tool

Step 2: Upload your file

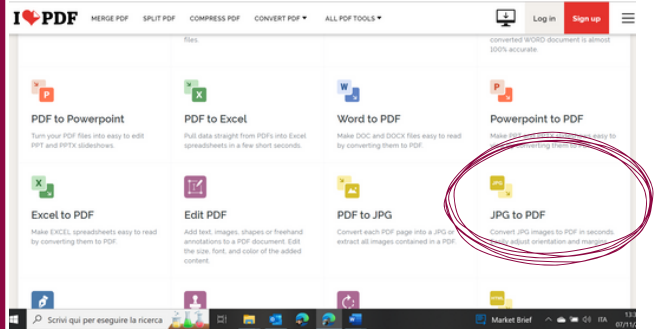

Step 3: Select pages and split

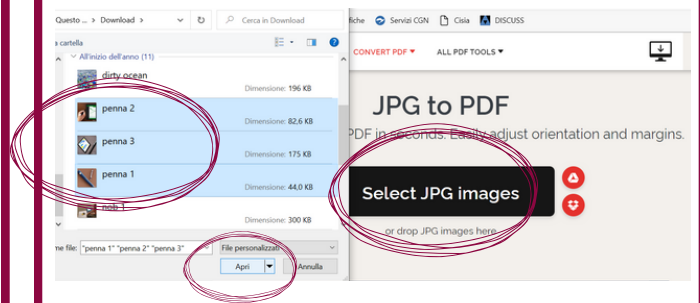

Situation 3:

Let's try step by step:

Step 1: Choose your tool

Step 2: Upload your file

Step 3: Format and convert
